

Oleksii Levchenko

iOS Developer

Experienced iOS developer with 4+ years of experience in creating mobile applications for iOS. Specializing in Swift and SwiftUI, I have hands-on experience with UIKit, CoreData, REST API, and integrating third-party libraries. I aim to grow in the direction of application architecture and performance optimization.

Experience

Developer Legacy, Remote Lead iOS Developer

Nov 2024 - Present

- Managing the development team and ensuring its effective performance.
- Analyzing and fixing bugs: processing bug reports and overseeing project quality.
- Project management: application development and finalization in accordance with established deadlines.
- Defining technical requirements for applications for the development team and the design department.
- Implementing new functionality when necessary.
- Optimizing workflows to enhance team productivity.

Noname Digital LLC, Remote iOS Developer

Sep 2024 - Dec 2024

- Development of iOS mobile applications from concept to publication in the App Store.
- Participation in the full development cycle: design, development, testing, deployment, and maintenance.
- Preparation and submission of applications to the App Store, working with App Store Connect.
- Resolving rejections and ensuring compliance with Apple's guidelines.
- Performance optimization and improvement of user experience (UI/UX).
- Integration of third-party services and APIs (Firebase, Adapty, CI/CD Codemagic).
- Maintenance and updates of existing applications in accordance with new requirements and iOS changes.

Next Level App, Kyiv, Ukraine iOS Developer

May 2023 - Sep 2024

- Designed and developed high-quality iOS applications using Swift, UIKit, and SwiftUI, ensuring modern and intuitive user interfaces.
- Optimized app performance and user experience, resulting in increased user engagement and positive feedback.
- Collaborated with cross-functional teams (designers, QA, product managers) to align development with business goals and user needs.
- Maintained and improved existing codebases, ensuring scalability, reliability, and ease of maintenance.
